Mr. Kermit Geary
1266 Riverview Drive
Walnutport,Penna. 18088

Dear Mr. Geary:

Thank You for your reception report of the WYZZ signal on December 30,1984.Your very concise logging of the programming agrees with our program logs for that date and time,confirming reception of the WYZZ signal.Thank You also for the comments on our programming.We have,over the years,attempted to hold a high standard for both our programming and for our technical quality.We are hoping that the new owners will continue to do so also but at this time,no one really knows how the programming will be changed.

Personally,I have a good idea of your location as I regularly travel through Walnutport,at least since the bridge at Lehigh Gap is closed,to get to the top of Blue Mountain where I service the television translator for WNEP.Knowing your location,at the foot of the mountain does convince me of the signal passage through the Gap.One final note,our transmitter output is 5kw. our antenna has a gain of 3db. considering line loss,we have an ERP of 9.o kw.

Cordially;

Ron Schacht
C.E.
